

GRAND OPENING SPECIAL OFFER – Absolique Hair Health Clinic’s Laser Therapy Hair Loss Treatments

Laser therapy hair loss treatment can be expensive and time consuming which is why Absolique Hair Health Clinic Trichologist would always address the obvious hair loss and hair thinning causes and symptoms first. We have always used laser therapy hair loss treatments in extreme hair loss cases but can now offer it as an affordable option in our new total hair care clinic location at Spring Hill.

We have professional clinical laser therapy equipment which can be used in our new private hair health clinic. Laser energy hair loss treatments need to be applied consistently to gain a result. Many years of trialling and tracking laser therapy hair loss treatment has demonstrated 12 weekly professional grade laser therapy hair loss treatments are effective to assist hair regrowth when in combination therapy, over a 16-week time frame. That looks like 12 weekly visits within 4 months.

Laser therapy hair loss treatment is suitable for those embarking on hair loss treatment for the first time and also for those on maintenance hair loss treatment but would like to see further results or when we have contributing factors that are difficult to treat such as Thyroid issues and stubborn hereditary pattern hair thinning.

Special Offer – Laser Therapy Hair Loss Treatments x 12 Package Total \$360
